PROFESSIONAL SUMMARY

Computer Science graduate with experience building full-stack web applications using Java, JavaScript, React.js, Next.js, Node.js, Express.js, MongoDB, and SQL. Experienced in developing secure RESTful APIs, implementing authentication, deploying scalable applications, and applying modern software engineering practices. Passionate about AI-assisted development, problem solving, and writing maintainable software. Familiar with Agile development, SDLC, CI/CD concepts, Git-based workflows, prompt engineering, and modern AI development tools. Strong foundation in Data Structures, Algorithms, OOP, DBMS, Operating Systems, and Computer Networks.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Cloud & DevOps: Docker, Git, GitHub, GitHub Actions, Vercel, Render

AI Tools: Groq AI API, Prompt Engineering, GitHub Copilot, ChatGPT

Developer Tools: VS Code, Postman, npm

Software Engineering: Agile, SDLC, Version Control, Debugging, Testing, MVC, OOP, DSA, DBMS, Operating Systems, Computer Networks

EDUCATION

Chitkara University

Bachelor of Technology in Computer Science Engineering – CGPA: 8.89/10

Punjab, India

2021–2025

RELEVANT COURSEWORK

- Data Structures & Algorithms
- Database Management Systems
- Computer Networks
- Object-Oriented Programming
- Operating Systems
- Software Engineering

PROJECTS

AI Cold Email Generator | React.js, Node.js, Express.js, MongoDB, Docker, Groq AI Live | GitHub

- Developed an AI-powered application generating personalised cold emails and LinkedIn messages using Groq LLM APIs and prompt engineering.
- Designed secure REST APIs using Express.js, JWT authentication, and MongoDB following modular software engineering practices.
- Containerised the application with Docker, automated builds using GitHub Actions, and deployed through Git-based workflows on Vercel and Render.
- Used AI-assisted development tools to accelerate feature implementation, debugging, and code quality.

Evently | Next.js, MongoDB, Clerk, Stripe Live | GitHub

- Built a scalable event management platform with Next.js, React, and MongoDB using reusable components.
- Implemented secure authentication using Clerk and integrated Stripe payment processing.
- Developed REST APIs for events, bookings, and user management while optimising server-side rendering and database queries.
- Collaborated using Git-based workflows and modern software engineering practices.

DoneDesk | React.js, Express.js, MongoDB Live | GitHub

- Built a task management application with secure authentication and role-based dashboards.
- Developed RESTful APIs supporting CRUD operations, task assignment, and user management.
- Applied reusable React components, debugging techniques, and Git version control to improve maintainability and software quality.

CERTIFICATIONS AND ACHIEVEMENTS

- Foundations of Prompt Engineering – AWS Training & Certification
- Oracle Databases for Developers: Foundations
- SQL (Intermediate) – HackerRank
- React Fundamentals – Iskima
- Solved 400+ Data Structures and Algorithms problems across coding platforms.
